

KEY FEATURES

- 1.5" (37.6 mm) edgewound aluminium ribbon voice coil
- Great power handling: 25 w AES
- High Sensitivity: 105 dB
- Very similar model to the CP22 but with wider horizontal dispersion (140°)
- Designed for applications with need of wide horizontal dispersion and precise high frequency coverage.

**GENERAL DESCRIPTION**

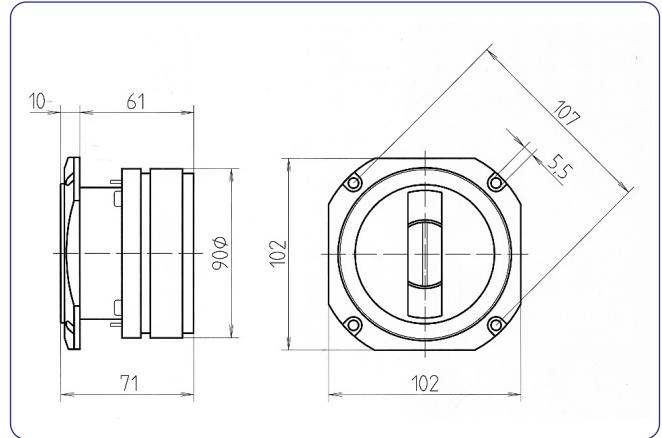

This compression tweeter is designed for use in multi-element loudspeaker systems in both sound reinforcement and studio applications. It features smooth response with wide controlled dispersion in the horizontal plane (140°). The voice coil is wound from flat aluminium wire, bonded to an aluminium diaphragm for extended response and excellent transient attack. The diaphragm assembly is field replaceable without soldering.

Notes:

*The power capacity is determined according to AES2-1984 (r2003) standard.
Program power is defined as the transducer's ability to handle normal music program material.

**Sensitivity was measured at 1 m distance, on axis, with 1 w input, averaged in the range 3-15 kHz
